

Single Sign-on with CAS Customer Requirements:

When you are ready to proceed with CAS authentication, please contact Vault Customer Support at support@vault.com. They will provide you with the URL needed in step 3 below if your Customer Success Manager did not already provide URL details. Once you have completed all the steps and required information listed, please return this form to support@vault.com.

1. Is your Vault platform in active use? Yes No

2. Please provide the following:

- Hostname _____
- Port _____
- Context (usually “/cas”) _____
- Protocol (CAS 1.0, 2.0, 3.0, or CAS over SAML 1.1) _____

3. Create records for the “development” and “production” versions of your platform based on the below URLs and check once complete:

- {yourplatform}.vault.test
- {yourplatform}.vault.com

4. Please provide more information about mapping for your data. The Vault platform can prepopulate the following user data during SSO. Please let us know what attribute name to expect for the below attributes:

- First Name _____
- Last Name _____
- Email Address _____
- Unique ID (username, SAML ID, email) _____
- A single degree name (“PhD”) OPTIONAL _____
- A single field of study (“Computer Science”) OPTIONAL _____
- Graduation Year OPTIONAL _____

5. Provide test credentials if possible.

- Username: _____ Password: _____
